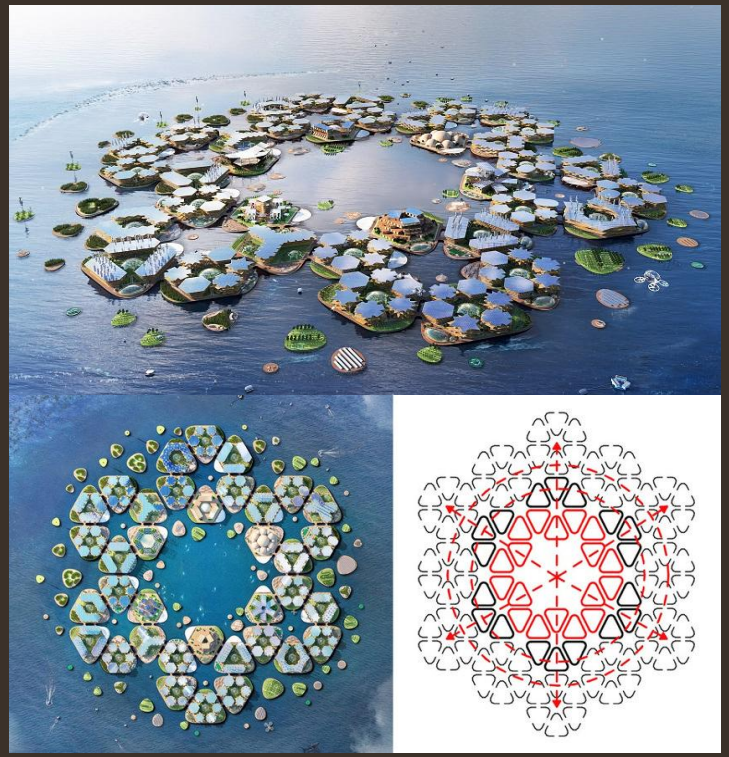
The Floating Cities of Light: a vibrant space in the Metaverse



*Placeholder images

We are building a city for the Metaverse.

The floating cities of light are a sustainable, adaptable and scalable home for our community.

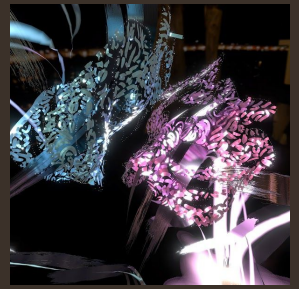
→ Geared towards **Standalone VR users** (ie. Meta Quest), a sector currently exploding.

→ Also accessible through web & mobile phones

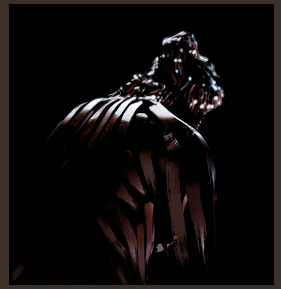
Confidential

Citizens of Light, a community of Metaverse builders

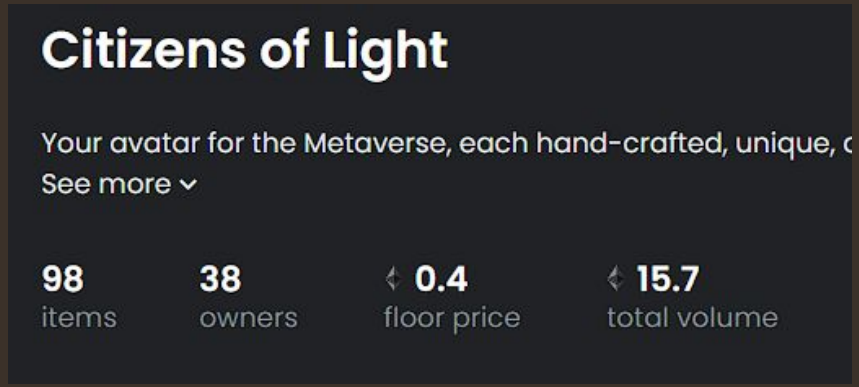
"#32 Paul"



"#40 Exaltation"



"#91 Venus"



The "Citizens of light" NTF is our **PFP** *(Picture For Proof)*:
Owning one gives you access to the community.

This translates to:

- Access to the Metaverse (except spaces open to visitors)
- Access to token-gated events
- Airdrops, private sales, exclusive drops and % of revenue

Final total number of PFPs in this collection:

→ **1000**

Confidential

Land: The floating islands

A Villa Island

The lands of the project are floating Islands NFTs:

- **Villa islands**
  private lands for individuals
- **City islands**
  public lands for organizations

The **initial supply will be airdropped** to the current community, around 50 people.
Supply will then grow steadily with community usage.

Final total number of Islands in the collection:

→ **756**

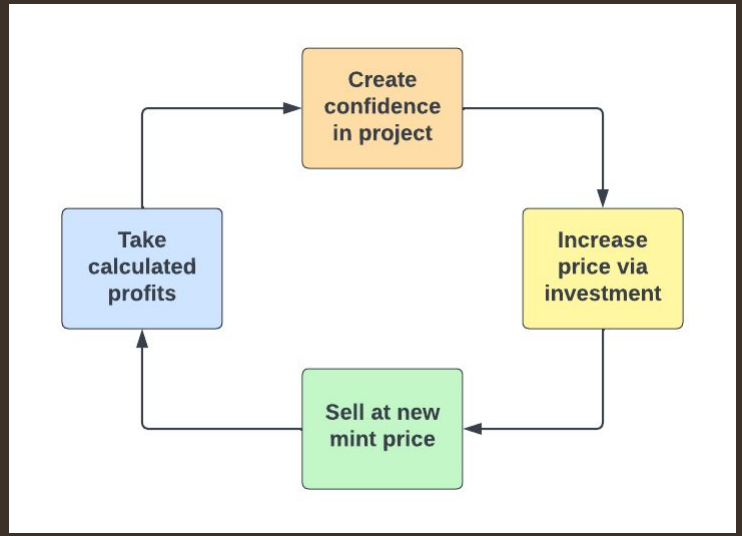
Accelerating growth & making profit: The pump spiral



1) We were able to create a small (~50 buyers) but very loyal community, trusting the project.

2) By investing $3000, we were able to increase the floor price of the PFP collection from 0.06 to 1 ETH (x16)

3) We then sold 10 PFPs for a discounted price of 0.25 ETH, through a special offer with a partner.

4) Net profit $3000

→ Reiterate

Funds ask

Phase 1

30 ETH *(~60k$)*
for 30 PFP pieces

~$50 000 for 3% of 1000 PFP
→ 1 ETH Per PFP
→ Implied valuation 1000 ETH (~1.8M$)

Phase 2

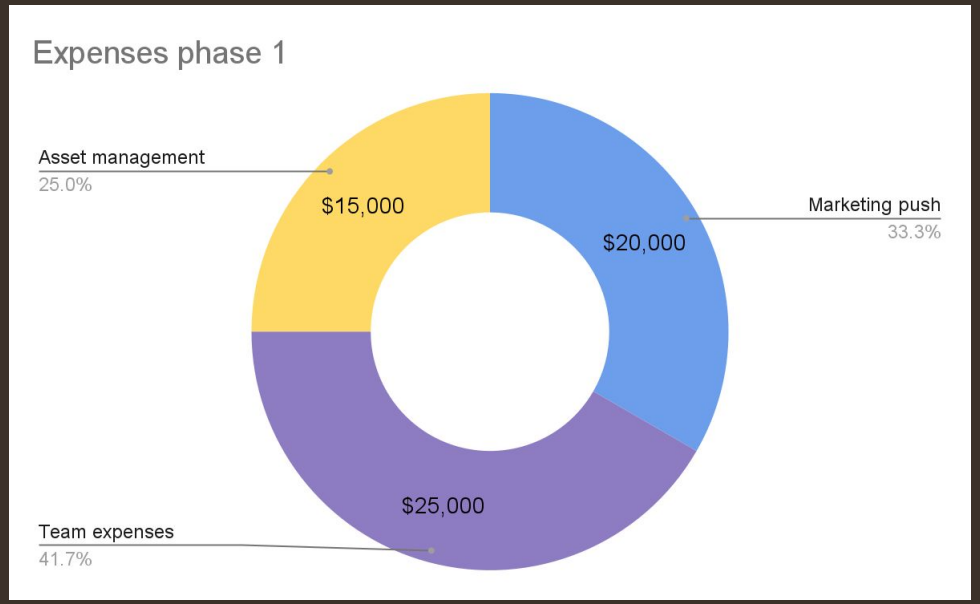
80 ETH *(~150k$)*
for 30 PFP pieces

~$150 000 for 3% of 1000 PFP
→2.6 ETH Per PFP
→ Implied valuation 3000 ETH (~5.6M$)

** Final price might be adjusted according to ETH value on time of raise*

Confidential

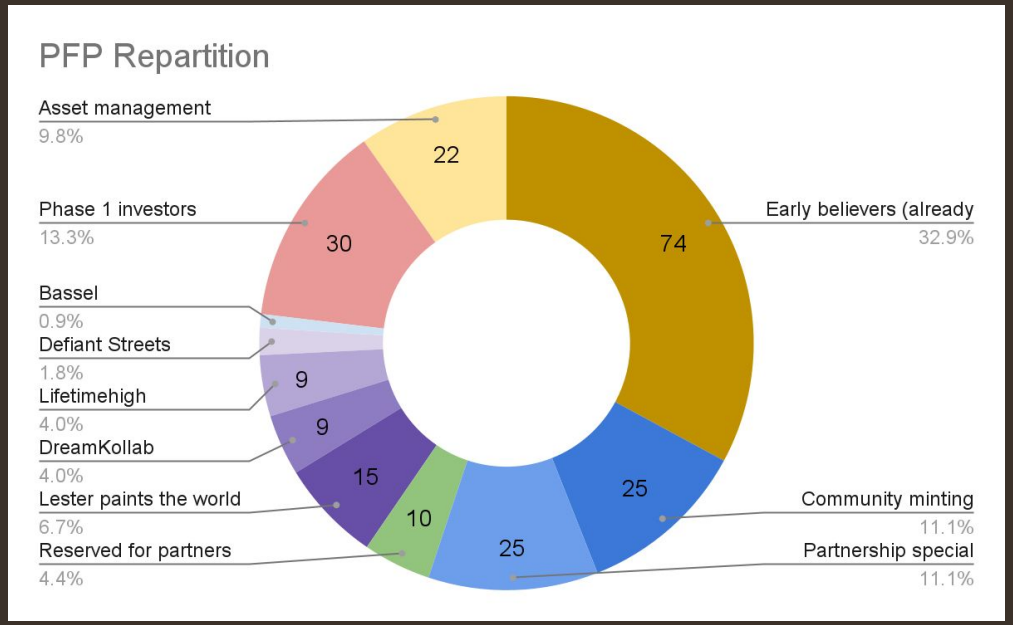
Expenses: phase 1



- Asset management liquidity pool allows us to control price
- Marketing push allow us to get to 200 PFP owners

Confidential

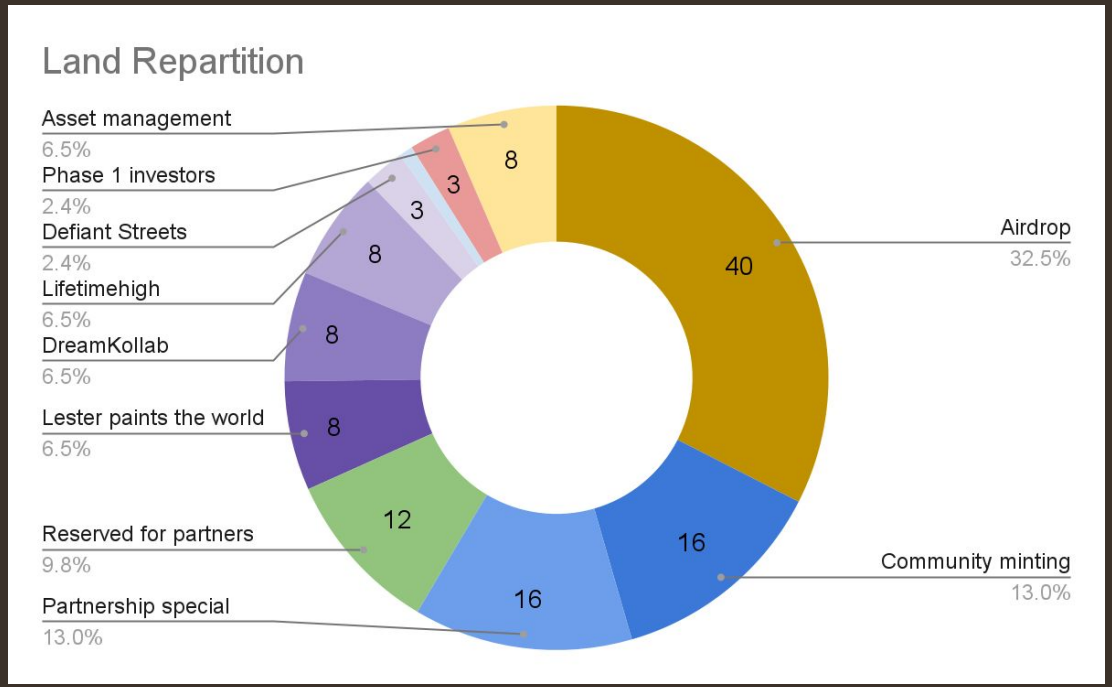
Phase 1 Asset Repartition: PFP



- All mints liquidity goes to the liquidity pool of the project
- **PFP repartition will be used a reference point for profit sharing**
  % of profit shared will be indicated by the number of PFP owned (enforced by a smart contract).
- All team members will be subject to a vesting schedule (linear)

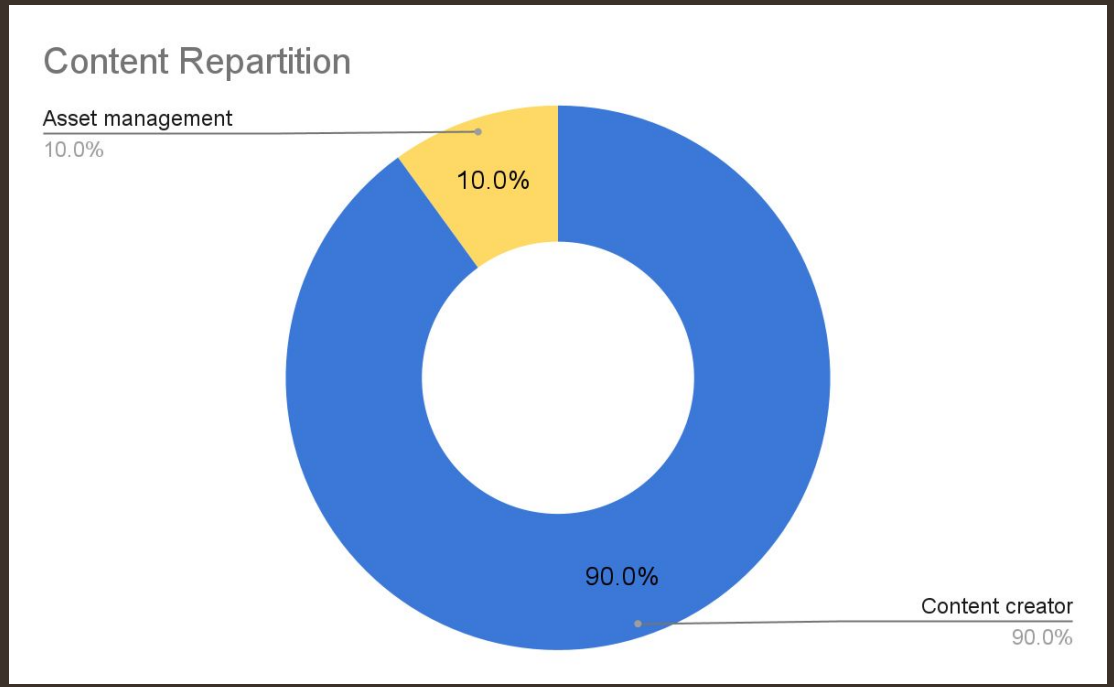
Confidential

Phase 1 Asset Repartition: Land



- All parties have a linear vesting schedule for lands

Phase 1 Asset Repartition: Content



- 10% of the asset goes to the project crate, managed by the FCL team
- The content creator is free to manage the % split for the rest, collection by collection (depending on sales etc.)

Host Metaverse

We are not building a Metaverse:

We are building **a brand** & **a community.**

The community will have a **main Host Metaverse** for its space, but might use other Metaverses, to take advantage of the different platforms (ex: full-body concerts in VRChat). The community might switch to a different metaverse down the line if more adequate ones become available.

Host Metaverse candidates:

Spatial.io

Somnium Space

Key partnerships

Large partners:

- VR Events organizers (Concerts, Festivals, Exhibitions)
- Asset designers (architecture, furniture, objects, avatars, wearables)
- Brands with Metaverse presence / NFT Brands
- VR art Galleries / NFT Galleries
- VR Movie producers

Small partners:

- VR artists / NFT artists
- Meetups groups
- VR teachers (dance teachers, language teachers) & VR Schools
